

CUSTOM CITRIX SOLUTIONS

Aspen Systems will work one-on-one with your team to create custom solutions that work for you. Whether your environment is 5 or 5,000 users in size, our engineers are familiar with any size of project.

Your employees expect mobility, but what about security? Not sure where to start?

Aspen Systems can help your organization achieve this goal, in a cost effective way. Our customized support plans include:

- Managed Services
- Escalation Support
- System Monitoring
- Time & Materials
- Project Contracts
- Staff Augmentation

- Accelerate and complete virtualization projects
- Centralize and secure applications and desktops
- Deliver applications and desktops to mobile users
- Extend team expertise and competencies
- Monitor critical infrastructure 24x7x365
- Provide an escalation path for in-house staff

IT solutions that work for your business.

HELPING YOU DELIVER DESKTOPS AND APPLICATIONS.... EVERY DAY.

We are committed to listening to our clients' needs, building solutions that address the organization's goals, and doing whatever it takes to solve problems.

Aspen Systems has a strong focus and deep understanding of the entire Citrix technology stack including XenApp, XenDesktop, XenServer and Netscaler. We have over 20 years' experience in the IT industry and hold Enterprise-level certifications from Citrix, VMware, Microsoft, AppSense, and Solarwinds.

flexible solutions for your business needs

APPLICATION VIRTUALIZATION

Application virtualization allows you to centralize and secure your applications within your data center. These centralized applications can then be delivered to users anywhere, at any time and on any device. It enables BYOD initiatives and increases mobility. Desktop management costs can be greatly reduced, allowing more efficient deployment and maintenance.

DESKTOP VIRTUALIZATION

Desktop virtualization allows you to deliver a single virtualized desktop to multiple users, regardless of their location or device. It increases business agility and helps enable BYOD initiatives. The central image can be optimized and secured to ensure employees get a new, consistent desktop with every connection. This greatly reduces cost and deployment time with desktop patching and OS migrations.

IT SUPPORT SOLUTIONS

- APP & DESKTOP VIRTUALIZATION
- BYOD SOLUTIONS
- CLOUD NETWORKING
- ENTERPRISE MOBILITY / MDM
- NETWORKING MANAGEMENT
- COLLABORATION

CONSULTING SOLUTIONS

We are highly focused on desktop & application delivery, offering flexible custom-built solutions that fix your exact need.

SUPPORT SOLUTIONS

Aspen Systems can help you support your infrastructure, providing an escalation path with top Citrix expertise. We will provide you and your team with peace of mind, and the knowledge that you have the resources you need to solve any problem.

MONITORING SOLUTIONS

Monitoring your systems is key to increasing uptime and proactively responding to problems. Our systems can monitor your servers, hypervisors, and systems like XenApp and XenDesktop.
